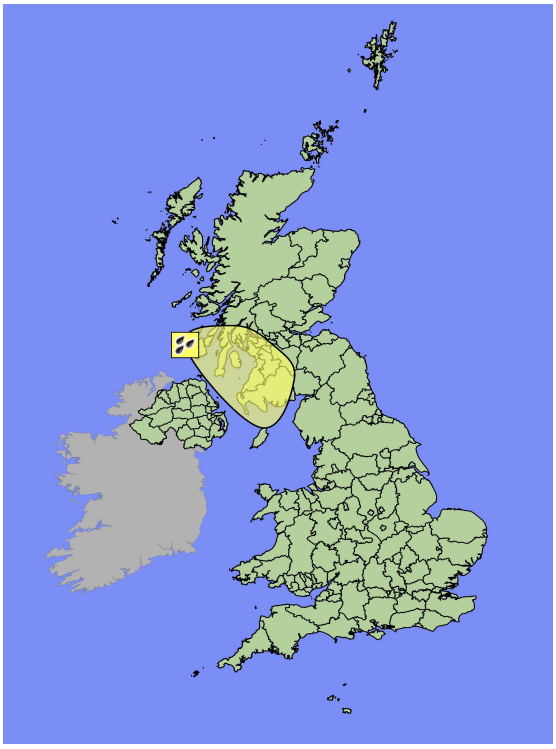
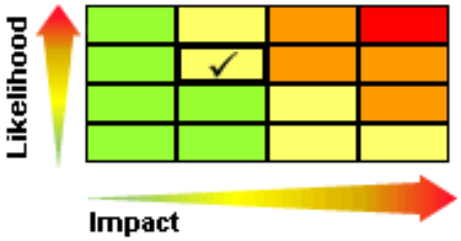
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system associated with a deepening depression moving northeastwards across the Atlantic will affect the UK later on Sunday and Monday. The heaviest and most persistent rain is expected over western regions and widespread accumulations of 20 to 40 mm are expected over parts of western and southwestern Scotland, northwest England and Wales. Locally 60 mm or more could fall over higher ground in Dumfries and Galloway and Ayrshire. Conditions will also be windy with gusts up to 60 mph over some exposed western coasts and hills.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **21:00 on Sun, 18th Nov 2012** until **12:00 on Mon, 19th Nov 2012**

A spell of heavy rain, accompanied by strong to gale force winds, will start to affect the region during Sunday evening and persist into Monday. Rain is then expected to ease later on Monday morning. The public should be aware of the risk of localised flooding.
